

Towinly

It takes two To Win.

Help and company for elders, from younger helpers nearby who earn trust step by step.

Investor overview · August 2026 · towinly.com

THE PROBLEM

Elders are alone. Helpers are willing.
No one has built the bridge.

15 cigarettes a day

the health toll of chronic loneliness (Surgeon General, 2023)

27% live alone

of US adults 60+ (Pew Research). Asking a stranger for help is still a gamble.

“Mom doesn’t want a stranger in her house. But she also won’t call us every time she needs help. So she goes without.”

Daughter of an 82-year-old, Toronto

Elders go without. Families worry. Willing helpers never find them.

THE SOLUTION

A trust app, on the phone elders already carry.

Elders

Ask for help or company. The elder leads every step.

Helpers

Give time, earn money, and build a Trust Score that travels with you.

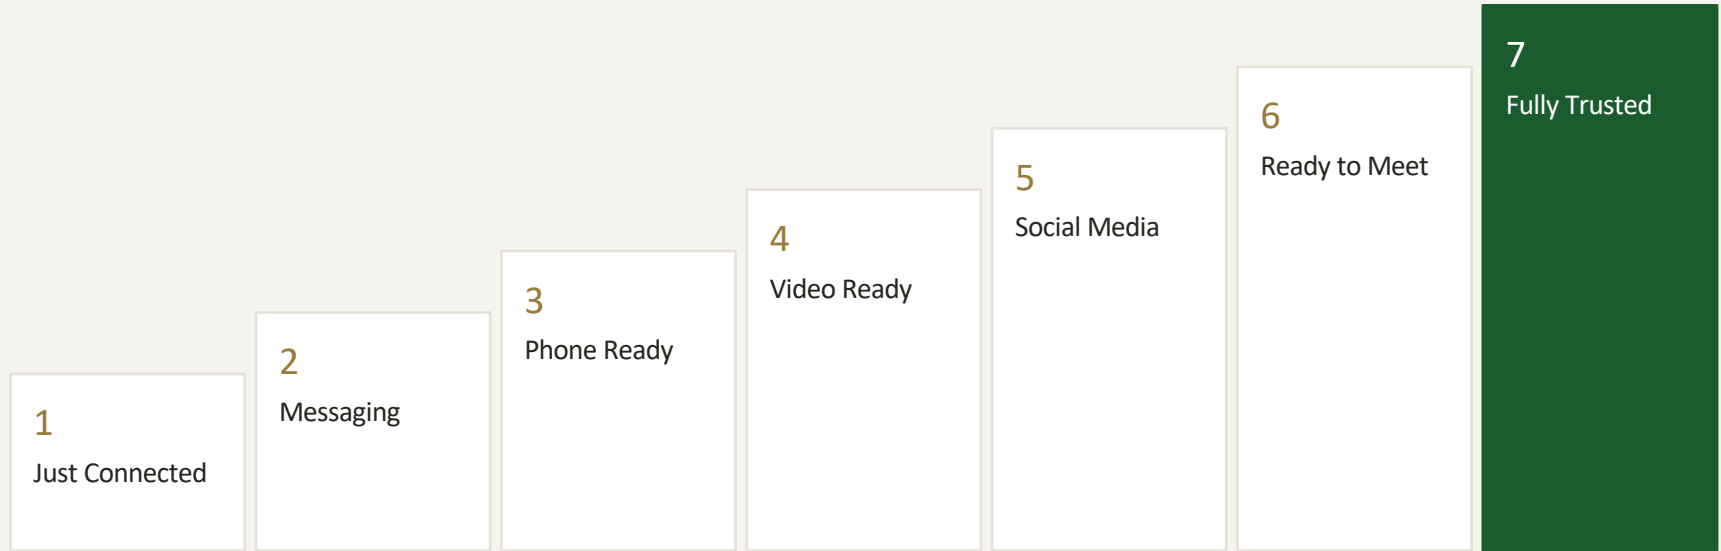

Families

Up to five relatives stay close: they see each friendship grow and hear when something needs attention.

Strangers at first. Trust earned step by step, and the elder always leads.

HOW IT WORKS

Seven steps. Both people must say yes.

Both people must agree to every step. Slow is the point.

THE TRUST SCORE

Trust, made visible.

Each connection is worth 15 points

Profile

+3

ID, phone and photo on file

Trust Ladder

+7

one point per step climbed together

Review

+5

one point per star from that person

Summed across every real friendship.

Score tiers

Getting Started

0

New Member

Elders open a helper's profile and read the Trust Score before they say yes.

WHY NOW

A first in history: elders online, and more of them than ever.

6×

smartphone growth
among US seniors in a
decade (Pew)

7 in 10

urban Indian 60+
payments are digital
(Kearney)

73 yrs

life expectancy, up
from 47 in 1950 (UN)

1 in 6

people will be 60+ by
2030 (WHO)

The biggest elder generation ever, and the first that pays online.

WHY IT MATTERS

More elders every year. Company keeps them well.

50%

HEALTH

better odds of survival for
people with strong social ties
(148 studies, PLOS Medicine)

US\$6.7B

MONEY

extra Medicare spending each
year on socially isolated older
adults (AARP, Stanford)

2.1B

THE FUTURE

people aged 60+ by 2050,
double 2020. India alone: 347M
(WHO, UNFPA)

Company isn't a luxury. Company is healthcare.

Both sides win.

Today's elders use phones, shop online, and pay online. Tomorrow there will be many more.
But the hardest parts of growing older haven't changed: feeling lonely, and not having enough energy for everyday things.

Elders		Helpers	
HAVE	Time, money, and life lessons to share	HAVE	Energy, time, and good company
NEED	Energy and company	NEED	Money, care, and life advice

Towinly is where they meet and share, and both win.

India and North America first. Then the world.

US\$1.6T+

TAM

the global elder-care economy
by 2030 (industry forecasts)

220M+

SAM

seniors in our home markets:
India (150M+) plus the US and
Canada (70M+)

2M elders

SOM

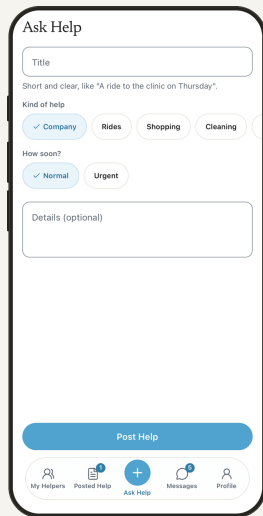

our first three years, about 1%
of home markets, city by city

Only 1% of India's senior care is organized today. The trust layer is wide open.

THE PRODUCT

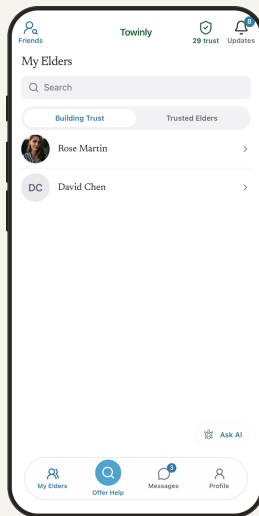

The app is built. One seat each.

ELDER

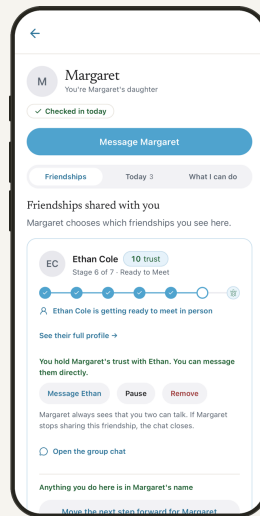

Ask for a ride, shopping,
cleaning or company.

HELPER

The elders you help,
and your trust score.

FAMILY

See your parent is well,
and message them.

iOS on TestFlight · Android build ready · towinly.com/app on any phone

What ships in version 1.

Help nearby

A ride, shopping, cleaning or company. Helpers nearby see it, 25 km by default, and offer a hand. The elder chooses.

Chat inside the app

Messages stay in Towinly. Phone numbers are shared only when both people agree.

Family watch

Up to five family members see each friendship climb, get alerts, and can step in when asked.

Daily check-in

One tap a day. If the elder goes quiet, linked family is told.

My boxes

Stories, letters, and a sealed box that opens only after a person at Towinly has checked a death certificate and waited thirty days.

Safety

SOS reaches emergency contacts. A block holds on every phone you sign in on, and push alerts never carry message text.

Help is easy to find. Trust takes time.

The product risk is behind us.

TestFlight

iOS 1.1.0 in testers' hands; the Android build is ready for Play

Live

on towinly.com with one-tap demo accounts, and in any phone browser

1,401

automated tests across 173 suites, all green

1 person

designed, built and shipped it all

Next: the store launch and the first pilot community. That is what we are asking for.

BUSINESS MODEL

Free for the first months.
Revenue is ready when we are.

Service commission	a small share of paid tasks such as rides and errands; companionship stays free
Elder Plus	optional subscription: priority matching, premium support
Helper Pro	optional subscription: more visibility, more applications
Family Dashboard	optional extras for adult children; the family view itself is free today
Partnerships	insurers, elder-care brands, hospitals

Everything is free at launch. We earn trust first. And always free for elders who cannot pay.

WHY WE WIN

Everyone else matches. Towinly builds trust.

Most apps

Match instantly with strangers

Built for the young

The elder is a customer

Family is locked out

Towinly

Seven trust steps, both say yes

Designed for a 75-year-old

Elders give back: skills, stories

Family watch, SOS, daily check-in

Elder cybercrime in India rose 86% in two years. Matching without trust is dangerous.

From first pilots to a platform for living well.

Live now

- iOS, Android and web
- Trust Ladder and Trust Score
- Help requests near you
- Family watch, five seats
- Check-in, SOS, blocks, alerts
- My boxes: what I pass on

Next 12 months

- App Store and Play launch
- In-app voice and video
- Background checks
- Neighbourhood groups
- Skill exchange
- Hindi and Tamil

Big bets

- Digital Soul
- Phone-line onboarding
- The post-work world

The big bets wait until the trust layer has earned them.

TEAM

One founder. The whole platform.

Harshavardhan Anbu Gowri

Founder · Full-Stack Engineer

Master's in Computer Science, Concordia University, Canada.

Built Towinly end to end: React Native app, React web, Spring Boot backend, security, deployment.

AI-native engineer and entrepreneur: ships with AI at every step, from code to design to this deck.

portfolioharsha.vercel.app

\$0

raised so far. Everything in this deck already exists, built by one person.

Every dollar raised goes to trust, safety and reach. The product is already built.

THE ASK

Join the first mile.

Pilot communities

senior centres, retirement residences,
neighbourhood associations

First-wave helpers

students, Gen Z volunteers, and retirees giving back

Family champions

adult children who bring Towinly home to a parent

Partners and funders

insurers, elder-care brands, funders of safety

Trust, built one connection at a time.
